

## GOT 6 MINUTES?

### Create bigger, brighter eyes

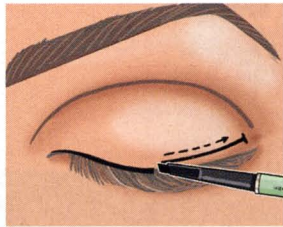

Yes, you can appear rested even if you skimp on sleep. New flat-edged eye pencils promise eye-opening results. “You get Angelina Jolie’s signature cat’s-eye for a more youthful, wide-eyed look,” says Mally Roncal, creator of Mally Beauty and a makeup artist who has worked with Jolie. Proof it works: With a new baby, Jolie still looks like she’s getting 40 winks!

—Leah Wyar

See the difference: Mally’s Shaping Secret Eyelift wand, (\$25; QVC.com) compared with a traditional pencil.

**1** The flat pencils have a rectangular base. To get the look, hold the pencil so the thin edge rests against your upper lash line.

**2** Line eye across to the center of the lid, then twist pencil so the fat side sits on lash line—and finish lining lid all the way to the outer corner.

**3** Blend the line with the built-in dabber. A heavier line on the outer half of the lid makes the eye seem wider, perkier. Good morning, superstar!
