

**I LOVE SMOKEY EYES!** Sexy, mysterious, alluring, chic, cool... It seems really complicated, right? Not with my smokey eye kit! It absolutely takes all the guesswork out of it. Just smooth on my cream to powder base, this will keep your smokey eyes smoldering all day.

Then, take the lightest shadow and lightly dust it all over the lid all the way to the browbone.

Next, take the medium tone and lay it from the lashline to just past the crease of your eye. If you have a flatter shaped eye, like me, just go up right past where you can feel your eyeball sit

in your socket, then blend up. Take the darkest tone and run that all over the lashline, top and bottom.

Finally, finish off with the pencil liner on top.

**The shades in both kits (Brownstone and Skyscraper... get it? CITY chick?) are softer than harsh blacks, so you can have smokin' eyes anytime.**
