

## So, here's what you are getting:

**A baby size Shimmer, Shape, and Glow!** [this little bit will get you hooked, I just know it! And you are just going to LOVE the full size SS&G! Totally chic!] You get the compact and some baby brushes. Here's how you apply:

**First, a fabulous shimmer** that is not TOO shiny, definitely not glittery but absolutely highlights and lifts. Just use the lighter end of the double brush and swipe it gently on the tips of your cheekbones, just under your temples (instant eye lift!).

**Next, it's time to shape!** Don't you just hate the word "contour?"

So 80's!!! I like to say shape, define, slim...

To find the perfect place to apply this step, pucker up and find the hollows of your cheeks. Use the darker end of the double brush, dust this luxurious powder just in those hollows right under the cheekbone. Don't worry, this powder is lightly pigmented so you only get a sheer defining, not a racing stripe. Ohhhh! Did someone just lose 5 lbs!?

**Finally, GLOW!** I have tried lots of blush in my day. There are lots of gorgeous colors to choose from but when you really want a natural lit-from-within glow, this is the one for you! Take the separate fluffy blush brush, just

smile in the mirror (love this part... say "hello, Gorgeous" every day!) and start in a circular motion in the apple of the cheek, slowly get bigger with your circles. Oh and p.s.... this takes about 30 seconds!!! And another p.s.... you can also use this product anywhere you want to shimmer, shape, and glow... like the décolleté, shoulders, and down the nose!!! Perfection!

**Next, you have a compact with a super gorgois eyeshadow!**

This is our incredible shadow formula in a delicious shade that will just make your eyes totally pop! Take this great shadow and apply it all over your lid from lashline to crease and then blend up... YUMMY! Another trick: take this shadow and add a drop of water and turn it into a gorgeous liner to run all along your lashline. You are just going to fall in love with this formula, Guys...it is soft, creamy, doesn't crease and lasts all day long! Hey, and for best results, always (as with any eyeshadow!) use an eyeshadow base or primer (we have a great one, heehee!)

**Finally, we have gloss!** In this kit, you get a full size lipgloss! Never sticky or tacky, just supershiny and wet-looking! To me, there is nothing that finishes off a look like a gorgeous, sexy, glossy lip! Sometimes, it is all you need.
